

SUJAY SUVARNA KULKARNI

Aspiring Data Scientist | AI/ML Engineer

+91 8856041842 | sk.kulkarni.sujay1@gmail.com | Pune, Maharashtra | [Portfolio](#) | [Github](#) | [LinkedIn](#)

Summary

Final-year B.Tech Computer Science (Artificial Intelligence) student with a strong interest in Machine Learning, Generative AI, and data-driven problem solving. Skilled in Python, SQL, Pandas, NumPy, and machine learning concepts, with hands-on experience developing AI/ML-based academic projects involving NLP, computer vision, and intelligent automation. Interested in building practical AI solutions and continuously developing skills in model development, data analysis, and AI application deployment.

Education

Nutan College of Engineering, Talegaon, Pune <i>B. Tech in Computer Science (A.I.), CGPA <u>7.59</u></i>	2023 - 2027
A.S.M's CSIT Junior College, Pimpri, Pune <i>Class 12th Aggregate <u>60%</u></i>	2021 - 2023
St. Joseph's Boys' High School, Khadki, Pune <i>Class 10th Aggregate <u>65%</u></i>	2020 - 2021

Technical Skills

Languages: Python, SQL, C, Java

Data & ML: Pandas, NumPy, Scikit-learn, Exploratory Data Analysis, Data Cleaning, Statistics, Machine Learning

AI & NLP: Natural Language Processing, Generative AI Fundamentals

Computer Vision: OpenCV, Deep Learning Fundamentals

Databases: MySQL

Data Visualization: Matplotlib, Seaborn, Microsoft Excel, Power BI

Core CS: Data Structures & Algorithms, OOP, DBMS

Tools: Git, GitHub, Jupyter Notebook, VS Code

Certifications

- L&T – Advanced Concepts of Machine Learning
- L&T – SQL for Data Analyst
- Generative AI Certification (2025)
- VOIS Power BI Foundation (2025)

Projects

A.R.I.S.E – AI Driven Gamified Self-Improvement Platform – *AI/ML, Web Development & Gamification*

- Built an adaptive self-improvement platform with quest-based learning, XP progression, and personalized recommendations.
- Developed intelligent mission, proof-validation, and hint systems for interactive learning and skill development.
- Designed a responsive futuristic dashboard for tracking user progress, achievements, levels, and multi-domain performance.

Automated Email Cleanup and Management System – *AI/ML + NLP + Intelligent Automation*

- Built an AI-powered email management system that classifies, prioritizes, summarizes, and categorizes emails using Python, Machine Learning, NLP, and the Gmail API.
- Developed intelligent email filtering and priority prediction to reduce inbox overload, automate email organization, and provide users with actionable insights through a responsive dashboard.

Crop Yield Prediction System & Income Prediction System - *AI/ML, Computer Vision & Smart Agriculture*

- Developed an AI-based system to analyze aerial field images, detect and count individual crops/flowers, and estimate total agricultural yield using computer vision and deep learning.
- Integrated yield-to-income estimation using crop weight and market price data, providing farmers with transparent produce valuation to reduce the risk of market exploitation.

Achievements

- Participated in AI/ML workshops conducted by Shell India and Edunet Foundation.
- Participated in Hackathon 2025 conducted in college
- Participated in Drawing and Painting, Poster making competitions in college campus
- Represented college in Cricket at intercollegiate

Interests & Hobbies

| Artificial Intelligence & Data Science | Data Exploration | Competitive Programming | Drawing and Painting |
